## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiki(5,406,308).

As to claims 1 and 3, Shiki(5,406,308) teaches an LCD display comprising the steps of: receiving a data signal(HSYNC) for indicating a time interval when a video data exists; detecting an enable initiation time of the data enable signal( HSYNC); generating a reset signal(HSET) at the enable initiation time of data signal(HSYNC) and resetting a source shift clock signal for sampling video data(see figures 1-2, 11-14; column 3, lines 30-40 and column 5, lines 7-43).

It would have been obvious to a data signal(HSYNC) as a data enable signal since a data signal(HSYNC) causes the time generating circuit(10) to generate a reset signal(HSET)(see figures 11-12 and column 5, lines 17-21).

3. Claims 2 and 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiki(5,406,308) and Sekido et al(5,999,158).

Shiki fails to disclose a source driving circuit for latching video signal after

sampling.

Sikido et al teach a source driving circuit having a latching circuit(4) for latching sampling video signal(see figure 4; column 3, lines 61-68 and column 4, lines 1-4). It would have been obvious to have modified Sekido et al with the teaching of Shiki, so as to transfer sampling data signal to an LCD display panel(see column 4, lines 2-4).

***Allowable Subject Matter***

4. Claims 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suga et al(6,348,931) teach a display apparatus having a clock generation circuit(103).

Lida et al(6,236,388) teach an LCD display having a timing generator(2).

Yang(4,855,724) teach an LCD display having a processor for generating a H RSET signal.
